### DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed August 24, 2004 have been acknowledged.
2. Examiner acknowledges amended claim 1.
3. The rejection of claims 1-5, 13-15, 19-21, 3-32 and 40-41 under 35 U.S.C. 103(a) as being unpatentable over Welsh et al., U.S. Patent Number 6,469,267 in view of Patel et al., U.S. Patent Number 6,451,505 is withdrawn due to applicant's argument.
4. The rejection of claims 1, 5-12, 16-18 and 22 under 35 U.S.C. 103(a) as being unpatentable over Welsh et al., U.S. Patent Number 6,469,267 in view of Patel et al., U.S. Patent Number 6,451,505 and in further view of Comiskey et al., U.S. Patent Number 6,473,072 is withdrawn due to applicant's argument.

### *Double Patenting*

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-25, 30-32 and 40-41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9, 11-23 and 27-29 of copending Application No. 10/077,419. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite a transparent multilayer comprising a first conductive layer containing an intrinsically conductive polymer, a film forming binder, and spacer elements embedded in and projecting from the surface of the first conductive layer, and a second conductive layer separated from the first conductive layer by spacer elements. The co-pending application does not specifically disclose that the first layer is deformable. The co-pending application does recite that the spacers are embedded in the first layer. Therefore, it would have been obvious to one of ordinary skill in the art that with the spacers embedded into the first layer, the layer is deformable.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
